Nordic collaboration against modern slavery and human trafficking

Labour exploitation rarely announces itself — it can begin with a housing problem, unpaid wages or a question about papers.

Join us for a half-day Nordic conference bringing together **experiences, research and practical approaches from Sweden, Norway and Finland**. We will explore how labour exploitation can be identified earlier, what frontline organisations and authorities are seeing, and what we can learn from each other across the Nordic countries.

The programme includes **Nordic research from HEUNI, frontline experience from Fair Play Bygg, perspectives from the Swedish Police Authority, and practical examples from The Salvation Army in Sweden and Norway.**
